May 16th Meeting Notes:

    Attendees:
        Ronny
        Robert
        Bogdan
        Jime

- NixOps4 no issues, but "slow" because of the May holidays and Nix community fork drama, but Robert does not have to spend any more time on those external issues. Good review with Taeer. No blockers.

- Create a list of relevant events maybe on Forgejo and we can all contribute

- Hardware: we need to check with Koen the status of it and if we have any due dates.

- Kick off: we might want to have a focus session (internal only). Maybe June/ July

- Next week: Jime to send a reminder on WED and with a tentative agenda.
